EXPERIENCE

Sr. Engineering Manager Apr 2026 – Present
Disbyte
Leading multiple engineering teams, connecting business vision with technical execution. I develop and mentor Engineering Managers, define the area's technical strategy alongside company priorities, and keep delivery predictable — balancing time-to-market with technical quality and the long-term health of the systems.

Mentor Mar 2025 – Present
TRIBU Tech Latam
Mentoring founders and tech leaders who want to take their businesses to the next level. Support includes scaling engineering teams, challenging strategic decisions, and exploring how to maximize business impact through software. Part of the DOMOS community of tech leaders.

Senior Software Engineering Manager Dec 2023 – Mar 2026
ITTI Digital
Drove technical excellence and fostered a culture of continuous collaboration. Led teams building scalable and secure software solutions for fintech clients and partners across Latin America, focused on innovation and overcoming infrastructure challenges in the region.

Engineering Manager Mar 2023 – Dec 2023
Pomelo
Led engineering teams building the new fintech infrastructure for Latin America. Managed cross-functional squads, drove hiring processes, and established engineering practices that scaled the organization from startup to growth stage.

Tech Lead Jun 2021 – Mar 2023
Pomelo
Technical leadership on one of LatAm's most ambitious fintech platforms. Designed and implemented core infrastructure components, mentored engineers, and coordinated across teams to deliver on an aggressive product roadmap.

Technical Lead Jan 2021 – Jul 2021
Naranja X
Led backend development and API design for one of Argentina's largest digital financial platforms, serving millions of users. Set technical direction for the team and mentored its engineers.

Senior Node.js Developer May 2020 – Jan 2021
Naranja X
Built and maintained backend services for the platform's financial products, progressing to Technical Lead within a year.

Senior Software Engineer Jun 2019 – May 2020
Banco del Sol

Backend development for a digital bank's core platform. Focused on building robust, high-availability services for financial products.

Software Developer
Dec 2017 – Jun 2019

iBillionaire

Developed mobile and web applications for a digital asset manager helping investors make smarter decisions. Stack: AWS (EC2, S3), Docker, Jenkins, Node.js, React.js, React Native.

Senior FullStack Developer
Aug 2016 – Dec 2017

Turismocity

Led the Hotels section end-to-end — frontend and backend — for a travel aggregator using AI to surface the best deals. Built public and private APIs in Node.js, integrating providers like Almundo, Atrápalo, and BestDay. Stack: Node.js, Vue.js, React Native, AngularJS, MySQL.

Mobile Development Professor
Aug 2014 – Dec 2017

Coderhouse

Designed and taught a mobile development course (Phonegap/Cordova) taking students from zero programming knowledge to shipping complete apps for Android, iOS, and Windows 8.

Web Developer
Jan 2014 – Aug 2016

wobiz

Built and maintained an online platform for creating and running virtual stores. Stack: PHP (OOP), AngularJS, MySQL, AWS.
